```

First let's get descriptive statistics for time 1 data to look at distributions in intervention vs control groups (which should be similar). First we will do this with all subjects, afterwards we will repeat with only our filtered dataset containing subjects that have data at times 1 and 2 and subjects who, if assigned, participated in the intervention / training.

T2TrainDidnotattendtrainingwhyn0	because I didn't want to get in trouble with my neighbors who wanted to take part in the training but were not ch because I live so far from the place they gave the training because my child was sick I couldn't come to the training. But I wanted to take part I I was in Cap Haitien I just got a job I lost my phone I move to countryside I move to countryside because I was sick I though it was not a serious thing I was in countryside I was not available in this moment I was not in Port-au-Prince when the training was given I was working at Arcahaie I was working at Leogane I wasn't choosen lack of time my child was sick my school the area was not secured and I have kids that't why I couldn't be there they didn't call me to come at the training was not there
T2TrainGiftuseful	a lot a pot with crystal glasses a wonderful pot a wonderful radio help me to have weather news help me to listen to radio news and political news I am always informed I am always with my radio, so it's useful I don't use it yet I embelish my house with I found a clock I use it to drink water it's important for me it help me to listen to radio news it's useful even if I don't use it yet it's useful for me at schoolli itil mwen nan lekol mwen it's very useful it helps me a lot it helps me in case of disaster it helps me to control the time it helps me to listen to radio news it helps to go out it was a resouce for me, my family and my neighbors because often there's no electricity it was useful it was very useful listen to radio news and listen to musique no oh yes the flashlight helps me to light and the radio to have radio news to drink water when I have to cut my hairs I don't have problem now yes yes a lot yes I found yes it's a flashlight yes it's very useful yes it helps me to listen to radio news yes it was useful yes it was useful it helps me to listen to radio news yes it was useful, thanks yes, a lot. they help to listen to radio news and light during the night yes, help me to have news about the weather yes, I received a radio which helps me a lot yes, I put water in yes, they will help us to drink water and can be used to throw out water in case of flooding yes,my daughter uses it to store food
	all

A better organization in the groups who had been trained
 a lot but we need materials
 After the SLM training we have to track the training to others
 All that I learned I used them for myself and my community
 allow more people to participate in the training
 antouka TT as yo the bay man fomasyon the itil mwen ampil
 Do this training more often, allow more people to take part, add more days for the training
 Do this training more often, allow more people to take part, add more days for the training keep contact with the
 Do this training more often, allow more people to take part, add more days for the training, expanding the training
 every thing is good
 everything is good
 everything was good
 everything was good the training should be expanded
 evrything was good
 Extension and continuity
 For all my life I will be able to help myself during disaster and ready to help others
 for life
 for my children in the future
 for my community
 for my family
 for my family and my neighbors
 he helps me to become less thoughtful
 help me to manage my stress
 help me to prepare for other disasters
 help to prepare for all other disasters
 help us to reforest the area
 I acquired new knowledge on disasters preparedness
 I acquired additional knowledge
 I acquired new knowledge
 I acquired new knowledge. For example what causes an earthquake and how to avoid to be victim of a disaster
 I am fine and nothing can trouble me
 I am not lying I acquired a lot of knowledge and I spend a good time during this training
 I am very satisfy and I practice them
 I am waiting for other training
 I can ask help for the community
 I didn't finish with the training I was sick
 I know what to do in case of disasters and how to help others
 I learned a lot of things about how to act during disasters and help others
 I live better, I have new knowledge. SLM told us to be careful. I share the SLM training with my neighbors. I feel
 I want you to help more people
 I was not trained
 I was very helpful, I know what to do in case of disasters
 I was very useful and it improves my knowledge
 I will always be prepared
 I will always remember that
 I will be able to help my community to survive in case of disasters
 I will be able to prepare myself for disasters, find a job
 I wish that we can keep staying in contact
 I would like that SLM do more trainings
 I would like the training to be continued
 I would like to have more training
 in acquiring more knowledge
 In case of disasters I know what to do
 In case of disasters such as hurricane, earthquake, flooding I know what to do
 in helping more other people
 in sharing the trainings with my family
 increase the training
 it's good for me because I have new knowledge
 it's good, when I share the trainings from the training with others they are always asking where I find all of this
 it's to track the training to others
 It's very good because now I know how to prepare for disasters. Thank you
 it's very good, because when I am stressed I do the relaxation exercise. I share what I learned with others. I help o
 it help me to talk to my family about how to prepare for other coming disasters
 it helps me a lot, because before the training I used to think another way. now I feel good, that why after the 3 d
 it helps me for my children
 it helps me to acquire new knowledge on natural disasters
 it helps me to prepare for other coming disasters
 it helps me to prepare myself and share the training I received
 it helps me to save my family from a bad situation
 it improves my knowledge
 it really helps me because when something wants to trouble me I just joke
 it supposed to be expanded to the whole community
 it was good for me because this training help me to think differently, I spent 3 wonderful days in this training
 it was really helpful

it was very useful
 it was very useful because I did the relaxation exercices when I feel bad and they help me
 Keep helping people
 Keep helping people like me
 Keep remain alert in the camp
 keep supporting people
 Mobilization in advance
 more motivation for the community
 more training
 My certificate will be useful
 Prepared for life
 Prepared Pou fe fas am desas epu Ede lot moiun you. Ede yo prepare man sante mantal you.
 Provide training to all vulnerable communities in Haiti
 share with others
 Take care of people so that the work can continue
 The SLM training help me and my neighbors, everything I received form SLM I shared with them
 The training should be expanded to the whole community
 the training should be for more days
 the training shows me how to live with my children and neighbors. It was very useful
 this training help evryone in the community because I share it with a lot of neighbors
 to help others and my family my neighbors
 to save my family and neighbors 's life in the future
 when I am sad I just remind all the exercices and advices from SLM training and do them and I feel better
 yes everything you will do I'll take part
 you supose to stay in contact on the trained people
 all

Table 21: Descriptive statistics of disaster preparation behaviors time 3 questions

Now let's perform a Cronbach's alpha analysis on disaster preparedness items - we can use the alphas if item is omitted to detect outliers.

```
psych::alpha(x = T1_DP_vars, cumulative = TRUE)

##
## Reliability analysis
## Call: psych::alpha(x = T1_DP_vars, cumulative = TRUE)
##
##   raw_alpha std.alpha G6(smc) average_r S/N   ase mean  sd
##      0.92    0.91    0.93    0.34  10 0.0053   11 5.6
##
## lower alpha upper    95% confidence boundaries
## 0.91 0.92 0.93
##
## Reliability if an item is dropped:

Let's look at the distribution of the coping variables to see how suitable for analysis they are individually.

```
for(var in cope_var_names) {
  print(ggplot(data, aes_string(x = var)) + geom_histogram(stat = "count"))
}
```

```

```
cope_var_names <- cope_var_names[c(1:6, 8:11, 14:17)]
```

It looks like the drugs, alcohol, and traditional healing questions are not well-distributed, but the others are fine for analysis. We'll exclude those 3.

Now we'll get alpha values for our *entire sample* at time 1 to assess the quality of the mental health and behavioral scales used in the survey.

```
psych::alpha(data %>% filter(timePoint_factor == "1") %>% select(starts_with("T1Stress")))
```

```

We also want to examine test-retest reliability for our various scales by doing a simple Pearson correlation from time 1 to time 2 in untreated subjects. We have to restructure our data using `tidyr::spread` to get it in the proper wide format.
